

CAHABA SUMMER MATH CHALLENGE

Our summer math challenge is all on Dreambox. Students, just go to [Dreambox.com](https://www.dreambox.com) and login with your username and password.

Grades K-2:

- 20 total lessons for the summer (avg 2-3 lessons per wk) AND
- at least 100 minutes for the summer (approximately 10-12 min per wk)

Grades 3-5:

- 28 total lessons for the summer (avg 3-4 lessons per wk) AND
- at least 120 minutes for the summer (approximately 12-15 min per wk)

Your completed lessons count toward your total minutes. For example, if you are in grades K-2 and you complete 20 lessons in 80 minutes, then you only have to spend 20 more minutes on Dreambox.

In the fall, let your teacher know you completed the challenge. They will look online to verify. 😊
